

So, what can Notion do?

Capture your team's knowledge, find answers across all your apps, and automate your busywork.

[Get Notion free](#)[Contact sales](#)

Capture knowledge.

Meetings, decisions, processes, product specs. The notes take themselves, and documentation keeps itself up to date.

Docs →

Create block-based docs that flex from a note to a full spec.

Databases →

Organize anything and connect it across your workspace.

AI Meeting Notes →

Capture every meeting, in one shared workspace.

Real-time collaboration →

Edit together live, with comments and instant updates.

Data syncs →

Pull live Salesforce and Jira data right into Notion.

Forms →

Collect responses straight into your databases.

Imports →

Bring your work over from any tool in minutes.

Mobile apps →

Capture and access your work from anywhere.

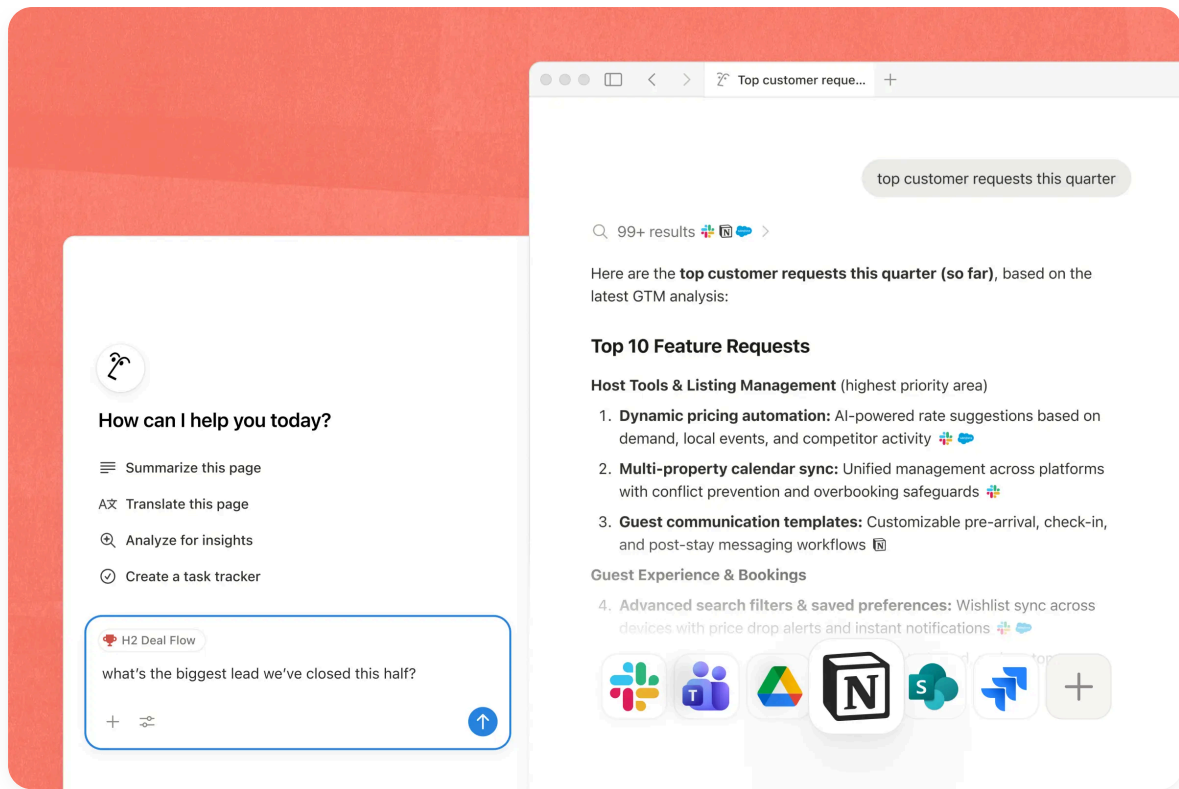

Web Clipper →

Save anything from the web to Notion in one click.

Find answers.

Was that info in an email? Slide deck? Slack message? Just ask Notion.

Enterprise Search →

Search across Notion, Slack, Jira, and more.

Wikis →

Keep your company knowledge in one verified home.

Teamspaces →

Give every team a home for their work.

Verified pages →

Show teams which content is trusted and current.

Charts and dashboards →

Visualize your data and track progress at a glance.

Kanban and Gantt views →

See your work as boards, timelines, and more.

Version history →

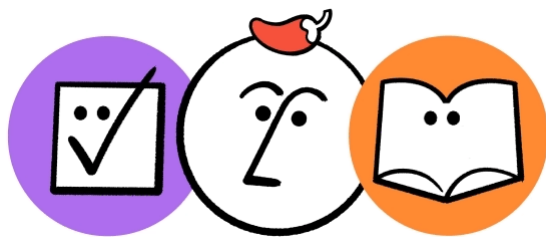

Track every change and restore earlier versions.

Backlinks →

See how every page connects across your workspace.

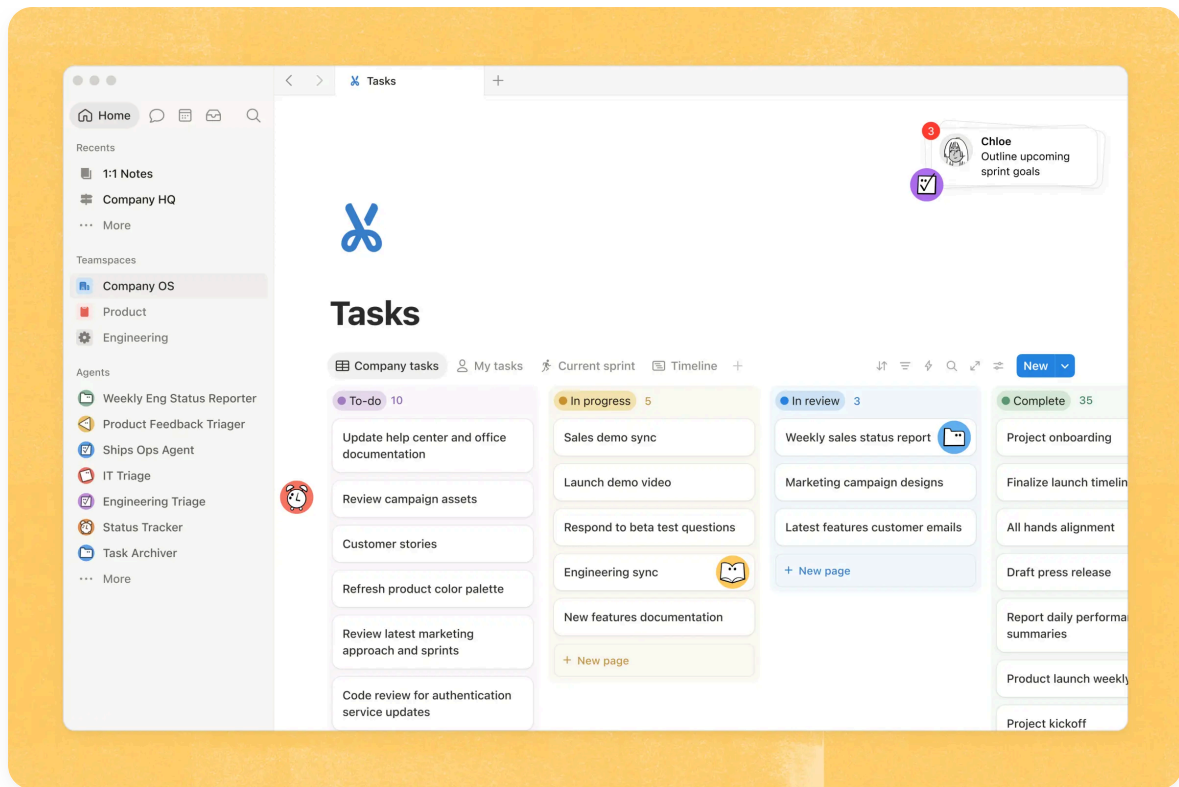

Link previews →

Preview Figma, GitHub, and more inline.

Automate busywork.

Agents own their own workflows 24/7, so you can focus on your life's work.

Notion Agent →

Chat with your personal agent that takes action across your work.

Custom Agents →

Build always-on agents for your team's workflows.

AI writing and editing →

Draft, edit, and polish your writing in seconds.

Agent Skills →

Use repeatable playbooks that teach agents how you work.

Dynamic triggers →

Kick off agent work the moment something changes.

Agent Orchestration →

Direct Claude, Cursor, and other agents from Notion.

API →

Build custom integrations on top of Notion.

MCP →

Connect any AI tool to Notion's context.

Database automations →

Automate repetitive database work, no code needed.

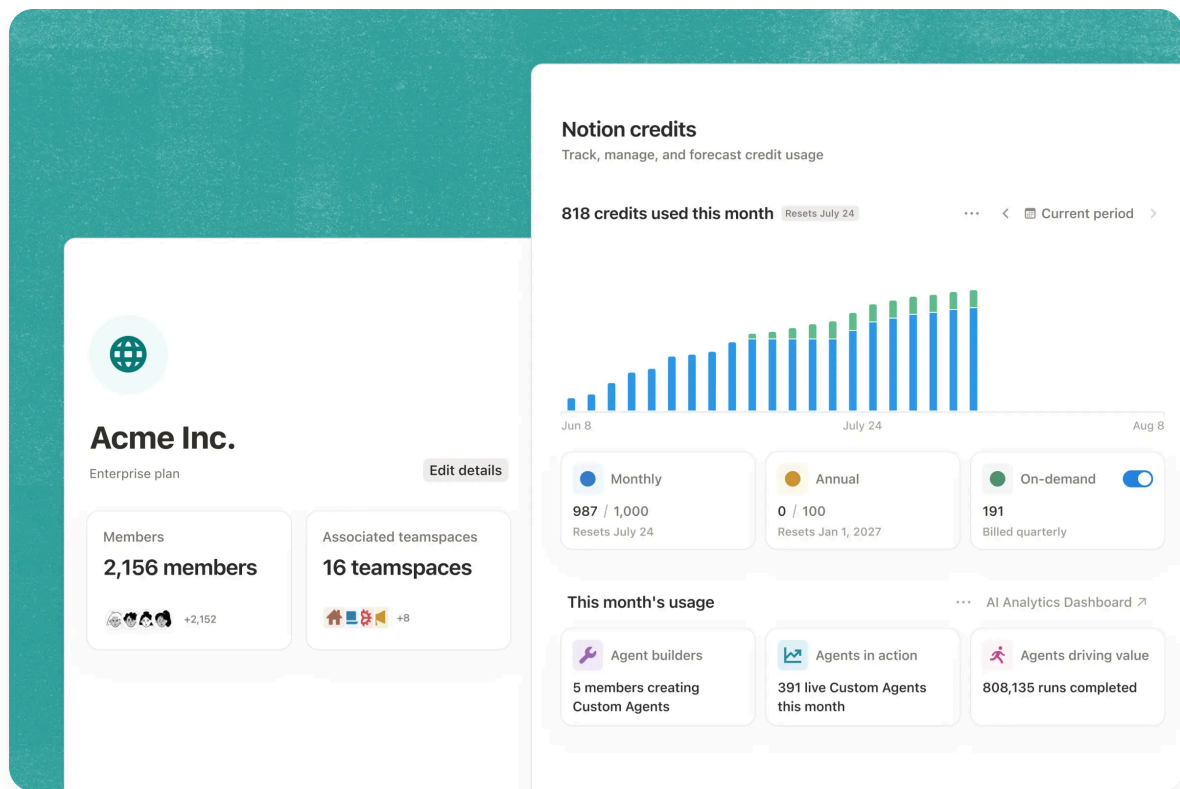

... .

Open Notion

SAML SSO →

Secure single sign-on through your identity provider.

SCIM API →

Automate user provisioning and deprovisioning.

Audit log →

Track key security and admin events across your org.

Granular user permissions →

Control exactly who can see and edit each page.

Granular agent permissions →

Scope exactly what every agent can see and do.

Agent governance →

Monitor and control every agent in your workspace.

Global compliance standards →

Meet GDPR, CCPA, and HIPAA requirements.

Third-party security certifications →

SOC 2 Type 2, ISO 27001, and BSI C5 certified.

Security and compliance partner integrations →

Connect your SIEM, DLP, and compliance platforms.

Robust data protection →

AES-256 encryption at rest, TLS 1.2+ in transit.

No training on your data →

No training on your data by default; ZDR on Enterprise.

Data residency →

Choose where your data is stored and kept.
