

Use Mind Maps in Gemini Notebook

Important: The Gemini Notebook mobile app does not support this feature at this time. [Learn more about the supported features in the Gemini Notebook mobile app](#) .

Mind Maps in Gemini Notebook visually summarize your uploaded sources, showing main topics and related ideas as a branching diagram.

When to use Mind Maps

- **Get a quick overview:** Understand the big picture and key themes of your source material quickly.
- **Explore and learn new things easily:** Get a clear entry point to new topics, making it easier to understand their main concepts before diving into the details.
- **Connect the dots:** Visually discover how different ideas relate to each other, and identify links and associations that might not be obvious.
- **Organize your thoughts:** Use Mind Maps to structure information, to improve how you understand and remember it.

Generate a Mind Map

1. In [Gemini Notebook](#) , open an existing notebook.
 - Or, create a new notebook and upload sources.
2. In the chat, select the **Mind Map** chip.
3. In the "Studio" panel, you can find a new note with your generated Mind Map.
 - You can revisit your Mind Map at any time.
4. To regenerate, select More : > **Delete note**.
 - This restarts the generation process.

Important: Gemini Notebook can be inaccurate; please double check its responses.

How to Interact with a Mind Map

- **Zoom in or out and scroll:** This allows you to navigate different parts of the Mind Map and focus on specific areas.
- **Expand or collapse branches:** You can expand branches to find more detailed sub-topics or collapse them to get a higher-level view.
- **Select nodes to ask questions:** Directly select a node in the Mind Map to ask questions in the Gemini Notebook chat about that specific topic.
- **Other:** To expand or collapse the view ↗, download ⬇, or exit ✕, look at the options in the top right corner.

How to save & share a Mind Map

- Option #1: Generate a Mind Map, then share the entire notebook with another user. They will be able to load the same Mind Map in the Studio panel.
- Option #2: Download the Mind Map by selecting **Download** within the Mind Map window and share the downloaded file.
 - **Tip:** Depending on the publisher's content restrictions, you may not be able to download artifacts generated using a notebook that has a Play Books ebook as a source.

Mind Map usage limits

Usage limits apply to Mind Map creation. [Learn more about Gemini Notebook usage limits](#).

Provide feedback

Your feedback helps us improve Mind Maps. To share your feedback, select Good content  or Bad content .

- If you found the Mind Map helpful, select .
- If you found the Mind Map unhelpful, inaccurate, biased, or otherwise problematic, select . Tell us more about your experience and provide additional feedback.
